Introduction

As part of FINRA's registration transformation and overall digital transformation, FINRA is [adding registration filings to FINRA Gateway](#). As of April 30, 2022, the Classic CRD BR filing process has been retired and all BR filings must be submitted through FINRA Gateway.

Changes made to the online filing process were driven by goals that included more logical grouping of information, refining completeness checks and data validations, and making support materials more accessible. These improvements should reduce any necessary training for new compliance and registration staff, improve the quality of data provided and decrease the volume of filings requiring corrections.

This document is intended to provide a high-level overview of the changes to the enhanced Form BR data entry experience. It describes both the changes to the way filers interact with the system and the enhancements to the data entry experience.

For questions or feedback regarding this documentation, please email feedbackfinragateway@finra.org or open an online self-service ticket through FINRA Gateway.
